ROTATOR

FastRotator

Move Heavy Parts.
Faster. Safer. Smarter.

Our website

LOST TIME, HIGH RISK, AND LIMITED PRODUCTIVITY.

In construction and industry, manual processes mean:

- Excessive reliance on manual labor and cranes
- High operational costs and delays
- Risk of accidents and worker fatigue

OUR SOLUTION

Simplify heavy work.
Cut effort.
Boost efficiency.

Safe rotation of 4t–20t pieces
Up to 40% faster operations
Quick ROI and proven reliability

Before

MORE RISK, MORE COST.

After

MORE SPEED, MORE SAFETY, MORE RESULTS.

WHY FASTROTATOR?

Engineered for demanding industries:
less crane time, **more** team independence.

Ergonomics

Safety

Operational autonomy

Flexibility

FR SERIES

Standard Rotators

FR704 (4t) & **FR1106 (6t)**
ideal for structural beams
and columns

Our core range:
robust, reliable, and ready to tackle any project.

FR SERIES

Semi-Standard Rotators

FR1508 (8t) & **FR2010 (10t)**
for companies increasing
production capacity

Two towers, precise rotation, perfect for beams, columns, and structural elements.

FFR SERIES

Face-to-Face Rotators

FFR1106 (6t)
ideal for welding columns,
beams, tubular structures.

When geometry gets challenging, double the power.
Two towers facing each other to rotate large or long components with accuracy.

ST SERIES

Single Tower Rotators

ST702 (2t)
Ideal for smaller parts, quick repairs, or tight spaces.

Key points:
mobility, flexibility, ease of integration.

Compact, agile, and powerful.
Single vertical tower and two synchronized arms.

OHR SERIES

Overhead Rotators

Overhead systems for large workshops and assembly lines.

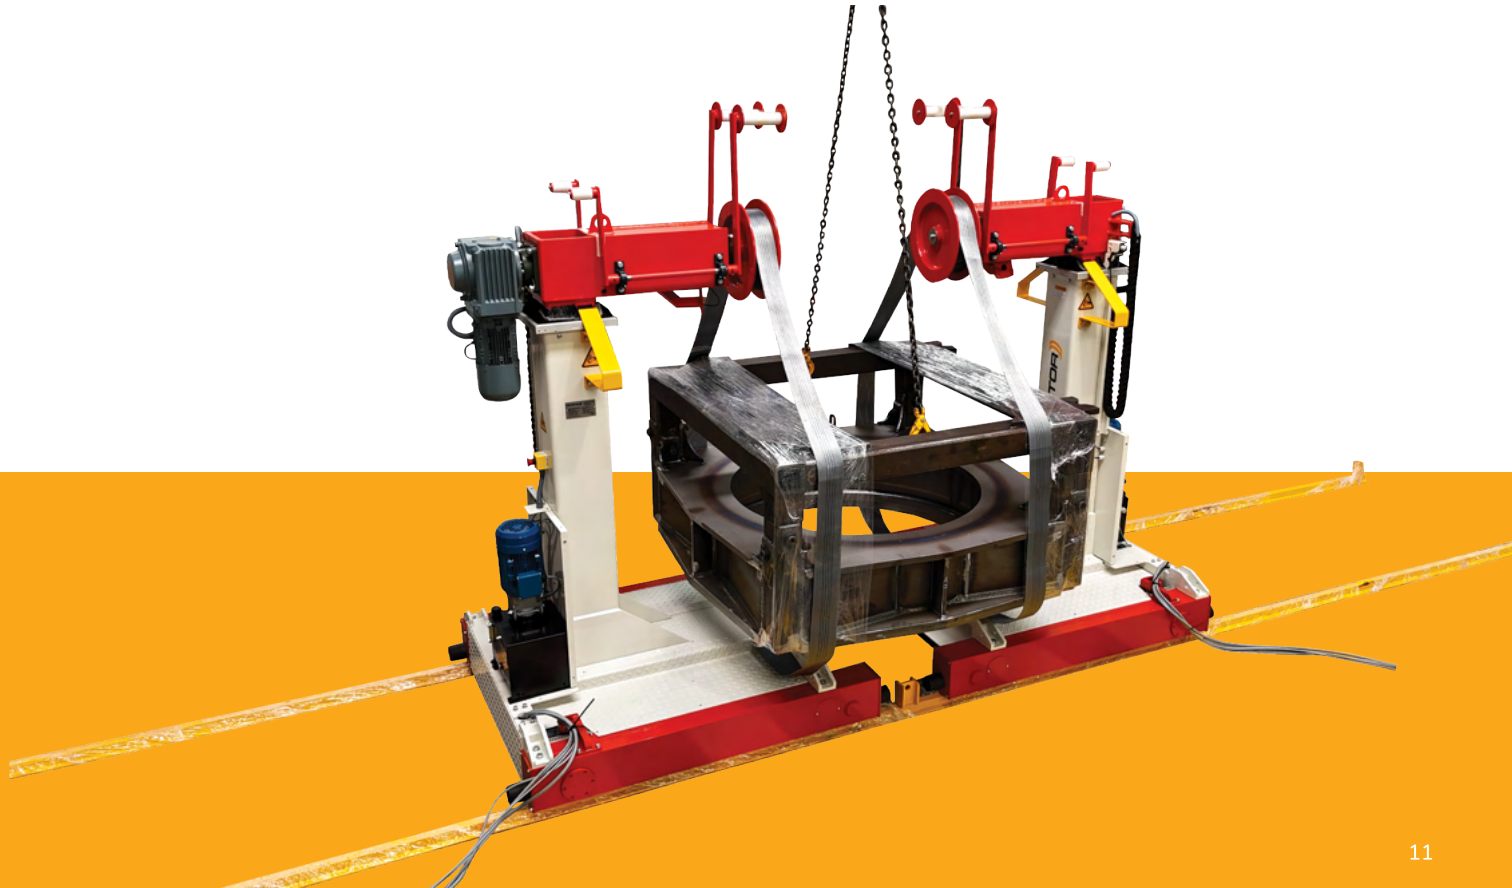

When floor space isn’t enough, we take rotation above.

CUSTOM SOLUTIONS

Every plant is unique.

We design and build custom rotators to match your exact needs: **weight, dimensions, automation, and integration.**

at Lomboser
Success Stories

"With the FastRotator, welders can position parts much faster than with manual methods, resulting in an average productivity increase of 40% on our factory floor."

APPLICATIONS

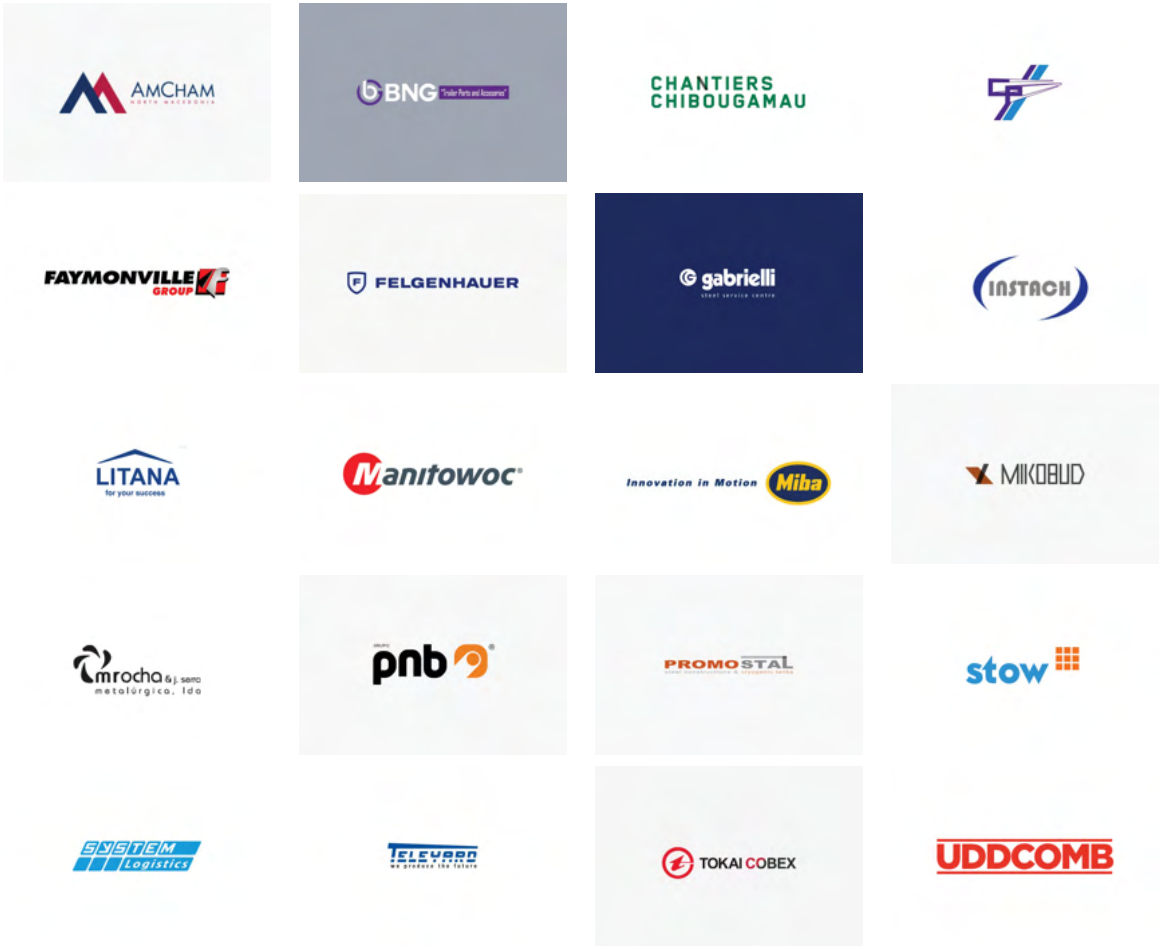

- ✓ Steel construction
- ✓ Heavy fabrication
- ✓ Shipbuilding
- ✓ Trailers & heavy machinery
- ✓ Renewable energy (wind towers)
- ✓ Aerospace
