Sander

Rotary-orbital sander - LVR series

Data sheet
LVR25

Description

OBER sanding products are ideal for sanding and polishing any type of surface. They are available in rotary, orbital and rotary-orbital versions. The rotary sanders are light and powerful. They are particularly useful for jobs involving high stock removal rates. They are available with abrasive discs, resin pads and wool bonnets.
The “L” version of the SVN models is fitted with a water tap for wet sanding. The orbital and rotary-orbital sanders have extractor outlets for connection to a dust extractor system.

Technical specification

Model	LVR25
Code	8102006
No-load speed - rpm/min	10000
Disc - ø mm	150
Length - mm	245
Work surface height - mm	135
Orbit - ø mm	8
Connecting thread	M8
Weight - kg	1,8
Air connection	3/8”GAS
Hose - ø min mm	10
Air consumption - Nl/min	650

Overall dimensions
